

# SAFETY DATA SHEET

Bolfo- / Trixie- Flea Spray

## SECTION 1: Identification of the substance/mixture and of the company/undertaking

### 1.1 Product identifier

**Product name** : Bolfo- / Trixie- Flea Spray  
**Product code** : 122000000797  
**Product description** : Not available.  
**Other means of identification** : 90206702; Bolfo Spray; Antipulci Spray Bolfo® / Spray Antiparassitario; Bolfo- / Trixie- Flohschutz-Spray

### 1.2 Relevant identified uses of the substance or mixture and uses advised against

**Identified uses** : Veterinary pharmaceutical.; Unfinished drug mixture  
**Uses advised against** : None known.

### 1.3 Details of the supplier of the safety data sheet

KVP Pharma + Veterinär Produkte GmbH  
Projensdorfer Straße 324  
24106 KIEL  
GERMANY  
0800/4534000

**e-mail address of person responsible for this SDS** : elanco\_sds@elancoah.com

### 1.4 Emergency telephone number

#### Supplier or Manufacturer

**Supplier Emergency telephone number** : CHEMTREC: 0800-181-7059 (free-phone)  
**Transportation Emergency telephone number** : CHEMTREC: 0800-181-7059 (free-phone)

## SECTION 2: Hazards identification

### 2.1 Classification of the substance or mixture

**Product definition** : Mixture

#### Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Aerosol 1, H222, H229  
Eye Irrit. 2, H319  
STOT SE 3, H336

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

**Ingredients of unknown toxicity** : 65 percent of the mixture consists of component(s) of unknown acute oral toxicity  
65 percent of the mixture consists of component(s) of unknown acute dermal toxicity  
10 percent of the mixture consists of component(s) of unknown acute inhalation toxicity

**Ingredients of unknown ecotoxicity** : Contains 65% of components with unknown hazards to the aquatic environment

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

### 2.2 Label elements

**Product name :** Bolfo- / Trixie- Flea Spray

**Version :** 0.01

**Date of revision :** 29 December 2022

**Date of previous issue :** No previous validation

**DE : ENGLISH**

1/14

## SECTION 2: Hazards identification

Hazard pictograms

:

Signal word

: Danger

Hazard statements

: H222, H229 - Extremely flammable aerosol. Pressurised container: may burst if heated.  
H319 - Causes serious eye irritation.  
H336 - May cause drowsiness or dizziness.

### Precautionary statements

Prevention

: P280 - Wear eye or face protection.  
P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.  
P211 - Do not spray on an open flame or other ignition source.  
P261 - Avoid breathing dust or mist.  
P251 - Do not pierce or burn, even after use.

Response

: P304 + P312 - IF INHALED: Call a POISON CENTER or doctor if you feel unwell.  
P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.  
P337 + P313 - If eye irritation persists: Get medical advice or attention.

Storage

: P410 + P412 - Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F.  
P403 + P233 - Store in a well-ventilated place. Keep container tightly closed.

Disposal

: P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.

Hazardous ingredients

: propan-2-ol

Supplemental label elements

: Not applicable.

Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles

: Not applicable.

### Special packaging requirements

Containers to be fitted with child-resistant fastenings

: Not applicable.

Tactile warning of danger

: Not applicable.

### Biocidal products regulation

#### Active substances

| Ingredient name |   | %      |
|-----------------|---|--------|
| propan-2-ol     | - | 34.747 |
| citric acid     | - | 0.0035 |

### 2.3 Other hazards

Product meets the criteria for PBT or vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

: This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

Other hazards which do not result in classification

: None known.

## SECTION 3: Composition/information on ingredients

### 3.2 Mixtures

: Mixture

| Product/ingredient name | Identifiers   | %         | Classification  | Specific Conc. Limits, M-factors and ATEs  | Type    |
|-------------------------|---|-----------|---|--|---------|
| propan-2-ol             | EC: 200-661-7<br>CAS: 67-63-0<br>Index: 603-117-00-0  | ≥25 - ≤50 | Flam. Liq. 2, H225<br>Eye Irrit. 2, H319<br>STOT SE 3, H336   | -  | [1] [2] |
| propoxur (ISO)          | EC: 204-043-8<br>CAS: 114-26-1<br>Index: 006-016-00-4 | <0.25     | Acute Tox. 2, H300<br>Acute Tox. 3, H331<br>Aquatic Acute 1, H400<br>Aquatic Chronic 1, H410<br><br><b>See Section 16 for the full text of the H statements declared above.</b> | ATE [Oral] = 41 mg/kg<br>ATE [Inhalation (dusts and mists)] = 0.645 mg/l<br>M [Acute] = 1<br>M [Chronic] = 1 | [1] [2] |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

#### Type

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

## SECTION 4: First aid measures

### 4.1 Description of first aid measures

#### Eye contact

: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.

#### Inhalation

: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If necessary, call a poison center or physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

#### Skin contact

: Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse.

#### Ingestion

: Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. If necessary, call a poison center or physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

#### Protection of first-aiders

: No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

### 4.2 Most important symptoms and effects, both acute and delayed

#### Over-exposure signs/symptoms

## SECTION 4: First aid measures

|                     |   |
|---------------------|---|
| <b>Eye contact</b>  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
| <b>Inhalation</b>   | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness |
| <b>Skin contact</b> | : No specific data.   |
| <b>Ingestion</b>    | : No specific data.   |

### 4.3 Indication of any immediate medical attention and special treatment needed

|                            |   |
|----------------------------|---|
| <b>Notes to physician</b>  | : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. |
| <b>Specific treatments</b> | : No specific treatment.  |

## SECTION 5: Firefighting measures

### 5.1 Extinguishing media

|                                       |   |
|---------------------------------------|---|
| <b>Suitable extinguishing media</b>   | : Use an extinguishing agent suitable for the surrounding fire. |
| <b>Unsuitable extinguishing media</b> | : None known.   |

### 5.2 Special hazards arising from the substance or mixture

|  |   |
|--|---|
| <b>Hazards from the substance or mixture</b> | : Extremely flammable aerosol. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Gas may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back, causing fire or explosion. Bursting aerosol containers may be propelled from a fire at high speed. |
| <b>Hazardous combustion products</b>         | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide  |

### 5.3 Advice for firefighters

|   |   |
|---|---|
| <b>Special protective actions for fire-fighters</b>   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.                                      |
| <b>Special protective equipment for fire-fighters</b> | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. |

## SECTION 6: Accidental release measures

### 6.1 Personal precautions, protective equipment and emergency procedures

|                                    |   |
|------------------------------------|---|
| <b>For non-emergency personnel</b> | : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. In the case of aerosols being ruptured, care should be taken due to the rapid escape of the pressurised contents and propellant. If a large number of containers are ruptured, treat as a bulk material spillage according to the instructions in the clean-up section. Do not touch or walk through spilt material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment. |
|------------------------------------|---|

## SECTION 6: Accidental release measures

**For emergency responders** : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

**6.2 Environmental precautions** : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

### 6.3 Methods and material for containment and cleaning up

**Small spill** : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

**Large spill** : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product.

**6.4 Reference to other sections** : See Section 1 for emergency contact information.  
See Section 8 for information on appropriate personal protective equipment.  
See Section 13 for additional waste treatment information.

## SECTION 7: Handling and storage

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 7.1 Precautions for safe handling

**Protective measures** : Put on appropriate personal protective equipment (see Section 8). Pressurised container: protect from sunlight and do not expose to temperature exceeding 50°C. Do not pierce or burn, even after use. Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing gas. Avoid breathing vapour or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Empty containers retain product residue and can be hazardous.

**Advice on general occupational hygiene** : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store away from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

#### Seveso Directive - Reporting thresholds

##### Danger criteria

| Category | Notification and MAPP threshold | Safety report threshold |
|----------|---------------------------------|-------------------------|
| P3a      | 150 tonne                       | 500 tonne               |

### 7.3 Specific end use(s)

**Recommendations** : Not available.

## SECTION 7: Handling and storage

**Industrial sector specific solutions** : Not available.

## SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

### 8.1 Control parameters

#### Occupational exposure limits

| Product/ingredient name | Exposure limit values   |
|-------------------------|---|
| propan-2-ol             | <b>TRGS 900 OEL (Germany, 2/2022).</b><br>TWA: 500 mg/m <sup>3</sup> 8 hours.<br>PEAK: 1000 mg/m <sup>3</sup> 15 minutes.<br>TWA: 200 ppm 8 hours.<br>PEAK: 400 ppm 15 minutes.<br><b>DFG MAC-values list (Germany, 10/2021).</b><br>TWA: 200 ppm 8 hours.<br>PEAK: 400 ppm, 4 times per shift, 15 minutes.<br>TWA: 500 mg/m <sup>3</sup> 8 hours.<br>PEAK: 1000 mg/m <sup>3</sup> , 4 times per shift, 15 minutes. |
| propoxur (ISO)          | <b>TRGS 900 OEL (Germany, 2/2022).</b><br>TWA: 2 mg/m <sup>3</sup> 8 hours. Form: Inhalable fraction<br>PEAK: 16 mg/m <sup>3</sup> 15 minutes. Form: Inhalable fraction<br><b>DFG MAC-values list (Germany, 10/2021).</b><br>TWA: 2 mg/m <sup>3</sup> 8 hours. Form: inhalable fraction<br>PEAK: 16 mg/m <sup>3</sup> , 4 times per shift, 15 minutes. Form: inhalable fraction                                     |

#### Biological exposure indices

| Product/ingredient name | Exposure indices  |
|-------------------------|---|
| propan-2-ol             | <b>DFG BEI-values list (Germany, 10/2021)</b><br>BEI: 25 mg/l, acetone [in blood]. Sampling time: end of exposure or end of shift.<br><b>TRGS 903 - BEI Values (Germany, 2/2022)</b><br>BEI: 25 mg/l, acetone [in whole blood]. Sampling time: end of exposure or end of shift. |

**Recommended monitoring procedures** : Reference should be made to monitoring standards, such as the following:  
European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

#### DNELs/DMELs

| Product/ingredient name | Type | Exposure             | Value                 | Population         | Effects  |
|-------------------------|------|----------------------|-----------------------|--------------------|----------|
| propan-2-ol             | DNEL | Long term Oral       | 26 mg/kg bw/day       | General population | Systemic |
|                         | DNEL | Long term Inhalation | 89 mg/m <sup>3</sup>  | General population | Systemic |
|                         | DNEL | Long term Dermal     | 319 mg/kg bw/day      | General population | Systemic |
|                         | DNEL | Long term Inhalation | 500 mg/m <sup>3</sup> | Workers            | Systemic |
|                         | DNEL | Long term Dermal     | 888 mg/kg bw/day      | Workers            | Systemic |

#### PNECs

No PNECs available

## SECTION 8: Exposure controls/personal protection

### 8.2 Exposure controls

**Appropriate engineering controls** : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

#### Individual protection measures

**Hygiene measures** : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

**Eye/face protection** : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.

#### Skin protection

**Hand protection** : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

**Body protection** : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves. Refer to European Standard EN 1149 for further information on material and design requirements and test methods.

**Other skin protection** : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

**Respiratory protection** : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

**Environmental exposure controls** : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

## SECTION 9: Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

### 9.1 Information on basic physical and chemical properties

#### Appearance

**Physical state** : Liquid.  
**Colour** : Colourless.  
**Odour** : Pleasant.  
**Odour threshold** : Not available.  
**Melting point/freezing point** : Not available.  
**Initial boiling point and boiling range** : Not available.  
**Flammability** : Extremely flammable

## SECTION 9: Physical and chemical properties

**Lower and upper explosion limit** : Not available.

**Flash point** : Not applicable.

**Auto-ignition temperature** : Not available.

**Decomposition temperature** : Not available.

**pH** : Not available.

**Viscosity** : Not available.

**Solubility(ies)** : Not available.

**Solubility in water** : Not available.

**Partition coefficient: n-octanol/ water** : Not applicable.

| Vapour pressure | Ingredient name   | Vapour Pressure at 20°C |              |        | Vapour pressure at 50°C |     |        |
|-----------------|-------------------|-------------------------|--------------|--------|-------------------------|-----|--------|
|                 |                   | mm Hg                   | kPa          | Method | mm Hg                   | kPa | Method |
|                 | propane           | 6300.51                 | 840          |        |                         |     |        |
|                 | butane            | 1602.88                 | 213.7        |        |                         |     |        |
|                 | Isopropyl alcohol | 33                      | 4.4          |        |                         |     |        |
|                 | propoxur (ISO)    | 0.0000075               | 0.000001     |        |                         |     |        |

**Evaporation rate** : Not available.

**Relative density** : Not available.

**Density** : 0.615 g/cm<sup>3</sup> [20°C (68°F)] [DIN 51757]

**Vapour density** : Not available.

**Explosive properties** : Not available.

**Oxidising properties** : Not available.

### Particle characteristics

**Median particle size** : Not applicable.

## 9.2 Other information

**Heat of combustion** : 29.56 kJ/g

### Aerosol product

**Type of aerosol** : Spray

## SECTION 10: Stability and reactivity

**10.1 Reactivity** : No specific test data related to reactivity available for this product or its ingredients.

**10.2 Chemical stability** : The product is stable.

**10.3 Possibility of hazardous reactions** : Under normal conditions of storage and use, hazardous reactions will not occur.

**10.4 Conditions to avoid** : Avoid all possible sources of ignition (spark or flame).

**10.5 Incompatible materials** : No specific data.

**10.6 Hazardous decomposition products** : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

## SECTION 11: Toxicological information

### 11.1 Information on toxicological effects

#### Acute toxicity

| Product/ingredient name | Result                          | Species | Dose                   | Exposure |
|-------------------------|---------------------------------|---------|------------------------|----------|
| propan-2-ol             | LC50 Inhalation Vapour          | Rat     | 72.6 mg/l              | 4 hours  |
|                         | LD50 Dermal                     | Rabbit  | 12800 mg/kg            | -        |
|                         | LD50 Oral                       | Rat     | 4570 mg/kg             | -        |
| propoxur (ISO)          | LC50 Inhalation Dusts and mists | Rat     | 1440 mg/m <sup>3</sup> | 1 hours  |
|                         | LC50 Inhalation Dusts and mists | Rat     | 0.645 mg/l             | 4 hours  |
|                         | LD50 Dermal                     | Rat     | >5000 mg/kg            | -        |
|                         | LD50 Oral                       | Rat     | 41 mg/kg               | -        |

**Conclusion/Summary** : Not available.

#### Acute toxicity estimates

| Product/ingredient name     | Oral (mg/kg) | Dermal (mg/kg) | Inhalation (gases) (ppm) | Inhalation (vapours) (mg/l) | Inhalation (dusts and mists) (mg/l) |
|-----------------------------|--------------|----------------|--------------------------|-----------------------------|-------------------------------------|
| Bolfo- / Trixie- Flea Spray | 5742.3       | N/A            | N/A                      | N/A                         | 258.1                               |

#### Irritation/Corrosion

| Product/ingredient name     | Result                   | Species | Score | Exposure        | Observation |
|-----------------------------|--------------------------|---------|-------|-----------------|-------------|
| Bolfo- / Trixie- Flea Spray | Eyes - Mild irritant     | Rabbit  | -     | -               | -           |
|                             | Skin - Not irritant      | Rabbit  | -     | -               | -           |
| propan-2-ol                 | Eyes - Moderate irritant | Rabbit  | -     | 10 mg           | -           |
|                             | Eyes - Moderate irritant | Rabbit  | -     | 24 hours 100 mg | -           |
|                             | Eyes - Severe irritant   | Rabbit  | -     | 100 mg          | -           |
|                             | Skin - Mild irritant     | Rabbit  | -     | 500 mg          | -           |

**Conclusion/Summary** : Not available.

#### Sensitisation

**Conclusion/Summary** : Not available.

#### Mutagenicity

**Conclusion/Summary** : Not available.

#### Carcinogenicity

**Conclusion/Summary** : Not available.

#### Reproductive toxicity

**Conclusion/Summary** : Not available.

#### Teratogenicity

**Conclusion/Summary** : Not available.

#### Specific target organ toxicity (single exposure)

| Product/ingredient name | Category   | Route of exposure | Target organs    |
|-------------------------|------------|-------------------|------------------|
| propan-2-ol             | Category 3 | -                 | Narcotic effects |

#### Specific target organ toxicity (repeated exposure)

Not available.

#### Aspiration hazard

Not available.

**Information on likely routes of exposure** : Not available.

#### Potential acute health effects

**Product name** : Bolfo- / Trixie- Flea Spray

## SECTION 11: Toxicological information

|                     |   |
|---------------------|---|
| <b>Eye contact</b>  | : Causes serious eye irritation.  |
| <b>Inhalation</b>   | : Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness. |
| <b>Skin contact</b> | : No known significant effects or critical hazards.                                     |
| <b>Ingestion</b>    | : Can cause central nervous system (CNS) depression.                                    |

### Symptoms related to the physical, chemical and toxicological characteristics

|                     |   |
|---------------------|---|
| <b>Eye contact</b>  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
| <b>Inhalation</b>   | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness |
| <b>Skin contact</b> | : No specific data.   |
| <b>Ingestion</b>    | : No specific data.   |

### Delayed and immediate effects as well as chronic effects from short and long-term exposure

#### Short term exposure

|                                    |                  |
|------------------------------------|------------------|
| <b>Potential immediate effects</b> | : Not available. |
| <b>Potential delayed effects</b>   | : Not available. |

#### Long term exposure

|                                    |                  |
|------------------------------------|------------------|
| <b>Potential immediate effects</b> | : Not available. |
| <b>Potential delayed effects</b>   | : Not available. |

#### Potential chronic health effects

Not available.

|                              |   |
|------------------------------|---|
| <b>Conclusion/Summary</b>    | : Not available.                                    |
| <b>General</b>               | : No known significant effects or critical hazards. |
| <b>Carcinogenicity</b>       | : No known significant effects or critical hazards. |
| <b>Mutagenicity</b>          | : No known significant effects or critical hazards. |
| <b>Reproductive toxicity</b> | : No known significant effects or critical hazards. |

## 11.2 Information on other hazards

### 11.2.1 Endocrine disrupting properties

Not available.

### 11.2.2 Other information

Not available.

## SECTION 12: Ecological information

### 12.1 Toxicity

## SECTION 12: Ecological information

| Product/ingredient name | Result                               | Species  | Exposure |
|-------------------------|--------------------------------------|--|----------|
| propan-2-ol             | IC50 >1000 mg/l                      | Algae - Desmodesmus subspicatus  | 72 hours |
|                         | LC50 1400 mg/l                       | Fish - Lepomis macrochirus   | 96 hours |
|                         | Acute EC50 7550 mg/l Fresh water     | Daphnia - Daphnia magna - Neonate  | 48 hours |
| propoxur (ISO)          | Acute LC50 1400000 µg/l Marine water | Crustaceans - Crangon crangon  | 48 hours |
|                         | IC50 22 mg/l                         | Algae  | 72 hours |
|                         | Acute EC50 1.9244 mg/l Fresh water   | Algae - Scenedesmus quadricauda  | 96 hours |
|                         | Acute IC50 >198000 µg/l Fresh water  | Aquatic plants - Lemna minor   | 96 hours |
|                         | Acute LC50 40.21 µg/l Marine water   | Crustaceans - Americamysis bahia - Juvenile (Fledgling, Hatchling, Weanling) | 48 hours |
|                         | Acute LC50 0.001 mg/l Fresh water    | Daphnia - Daphnia pulex  | 48 hours |
|                         | Acute LC50 1.3 ppm Fresh water       | Fish - Ictalurus punctatus   | 96 hours |
|                         | Chronic NOEC 0.2 mg/l Fresh water    | Algae - Chlorella vulgaris   | 96 hours |
|                         | Chronic NOEC 24600 µg/l Fresh water  | Aquatic plants - Lemna minor   | 96 hours |
|                         | Chronic NOEC 0.023 ppm Fresh water   | Daphnia - Daphnia magna  | 21 days  |

**Conclusion/Summary** : Not available.

### 12.2 Persistence and degradability

| Product/ingredient name | Test | Result                    | Dose | Inoculum |
|-------------------------|------|---------------------------|------|----------|
| propan-2-ol             | -    | >70 % - Readily - 10 days | -    | -        |

**Conclusion/Summary** : Not available.

| Product/ingredient name | Aquatic half-life | Photolysis | Biodegradability |
|-------------------------|-------------------|------------|------------------|
| propan-2-ol             | -                 | -          | Readily          |

### 12.3 Bioaccumulative potential

| Product/ingredient name | LogP <sub>ow</sub> | BCF | Potential |
|-------------------------|--------------------|-----|-----------|
| propan-2-ol             | 0.05               | -   | low       |
| propoxur (ISO)          | 1.52               | -   | low       |

### 12.4 Mobility in soil

**Soil/water partition coefficient (K<sub>oc</sub>)** : Not available.

**Mobility** : Not available.

### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

### 12.6 Endocrine disrupting properties

Not available.

### 12.7 Other adverse effects

No known significant effects or critical hazards.

## SECTION 13: Disposal considerations

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 13.1 Waste treatment methods

#### Product

**Methods of disposal** : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.

## SECTION 13: Disposal considerations

- Hazardous waste** : The classification of the product may meet the criteria for a hazardous waste.
- Packaging**
- Methods of disposal** : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.
- Special precautions** : This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Do not puncture or incinerate container.

## SECTION 14: Transport information

|                                 | ADR/RID  | ADN  | IMDG  | IATA   |
|---------------------------------|--|--|---|--|
| 14.1 UN number or ID number     | UN1950   | UN1950   | UN1950  | UN1950   |
| 14.2 UN proper shipping name    | AEROSOLS   | AEROSOLS   | AEROSOLS  | AEROSOLS   |
| 14.3 Transport hazard class(es) | 2<br> | 2<br> | 2.1<br>  | 2.1<br> |
| 14.4 Packing group              | -  | -  | -   | -  |
| 14.5 Environmental hazards      | No.  | No.  | Yes.  | Yes. The environmentally hazardous substance mark is not required.                         |

### Additional information

- ADR/RID** : **Tunnel code** (D)
- IMDG** : The marine pollutant mark is not required when transported in sizes of ≤5 L or ≤5 kg.
- IATA** : The environmentally hazardous substance mark may appear if required by other transportation regulations.

- 14.6 Special precautions for user** : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

- 14.7 Maritime transport in bulk according to IMO instruments** : Not available.

## SECTION 15: Regulatory information

### 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

#### EU Regulation (EC) No. 1907/2006 (REACH)

##### Annex XIV - List of substances subject to authorisation

###### Annex XIV

None of the components are listed.

###### Substances of very high concern

None of the components are listed.

- Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles** : Not applicable.

##### Other EU regulations

## SECTION 15: Regulatory information

**Industrial emissions  
(integrated pollution  
prevention and control) -  
Air** : Not listed

**Industrial emissions  
(integrated pollution  
prevention and control) -  
Water** : Not listed

### Ozone depleting substances (1005/2009/EU)

Not listed.

### Prior Informed Consent (PIC) (649/2012/EU)

Not listed.

### Persistent Organic Pollutants

Not listed.

**Aerosol dispensers** :

3

Extremely flammable

### Seveso Directive

This product is controlled under the Seveso Directive.

#### Danger criteria

| Category |
|----------|
| P3a      |

### Biocidal products regulation

#### Active substances

| Ingredient name |   | %      |
|-----------------|---|--------|
| propan-2-ol     | - | 34.747 |
| citric acid     | - | 0.0035 |

### National regulations

**Storage class (TRGS 510)** : 2B

### Hazardous incident ordinance

This product is controlled under the Germany Hazardous Incident Ordinance.

#### Danger criteria

| Category | Reference number |
|----------|------------------|
| P3a      | 1.2.3.1          |

**Hazard class for water** : 2

**Technical instruction on  
air quality control** : TA-Luft Number 5.2.5: 99.7%  
TA-Luft Class I - Number 5.2.5: 0.2%

**AOX** : The product does not contain organically bound halogens which could lead to an AOX value in waste water.

**15.2 Chemical safety  
assessment** : This product contains substances for which Chemical Safety Assessments are still required.

## SECTION 16: Other information

Indicates information that has changed from previously issued version.

### Abbreviations and acronyms

: ATE = Acute Toxicity Estimate  
CLP = Classification, Labelling and Packaging Regulation [Regulation (EC) No. 1272/2008]  
DMEL = Derived Minimal Effect Level  
DNEL = Derived No Effect Level  
EUH statement = CLP-specific Hazard statement  
N/A = Not available  
PBT = Persistent, Bioaccumulative and Toxic  
PNEC = Predicted No Effect Concentration  
RRN = REACH Registration Number  
SGG = Segregation Group  
vPvB = Very Persistent and Very Bioaccumulative

### Procedure used to derive the classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

| Classification   | Justification  |
|--|--|
| Aerosol 1, H222, H229<br>Eye Irrit. 2, H319<br>STOT SE 3, H336 | On basis of test data<br>On basis of test data<br>Calculation method |

### Full text of abbreviated H statements

|            |  |
|------------|--|
| H222, H229 | Extremely flammable aerosol. Pressurised container: may burst if heated. |
| H225       | Highly flammable liquid and vapour.                                      |
| H300       | Fatal if swallowed.  |
| H319       | Causes serious eye irritation.   |
| H331       | Toxic if inhaled.  |
| H336       | May cause drowsiness or dizziness.                                       |
| H400       | Very toxic to aquatic life.  |
| H410       | Very toxic to aquatic life with long lasting effects.                    |

### Full text of classifications [CLP/GHS]
